

# Keylongest 26

## Commercial Intelligent Key Management

The K26 is a key management system ideal for key and other assets that require a high level of security and accountability. It is an electronically controlled steel cabinet that restricts access to keys or key sets, and can only be opened by authorized personnel.

K26 keeps a record of key removals and returns - by whom and when. An essential addition to K26 Systems, smart key fob securely locks in place and monitors K26 keys whether removed so they are always ready for use.

## > Operation

- Big, bright 7" Android touchscreen, easier-to-use interface
- Modular design
- Keys are securely attached using special security seals
- Keys or keysets are individually locked in place
- Plug & Play solution with advanced RFID technology
- Standalone Edition and Network Edition
- PIN, Card, Face ID access to designated keys

## > K26 Features

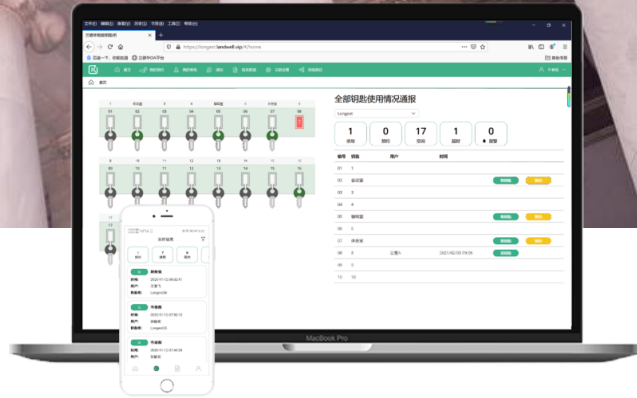

- Keys are available 24/7 to authorized staff only
- User, key and access rights administration
- Keys audit and reporting capacity via screen/USB port/Web
- 26 robust, long-life key fobs with security seals
- 26 locking receptors with LEDs
- Key reservation and application
- Audible and visual alarms
- Emergency Release System
- Multi-system networking

## > K26 Specifications

|                     |                                    |
|---------------------|------------------------------------|
| <b>Key Capacity</b> | <b>up to 26 keys / keysets</b>     |
| Body Materials      | Steel + ABS                        |
| Technology          | RFID                               |
| Operating System    | Based on Android                   |
| Display             | 7" touch screen                    |
| Key Access          | Face, Card, PIN code               |
| Cabinet Dimensions  | 566W X 380H X 177D (mm)            |
| Weight              | 19.6Kg                             |
| Power Supply        | Input: 100~240V AC, Output: 12V DC |
| Power consumption   | 12V 1.5amp max                     |
| Moungting           | Wall                               |
| Temperature         | -20°C~55°C                         |
| Network             | Wi-Fi (only 2.4G Wi-Fi), Ethernet  |
| Management          | Networked or Standalone            |
| Certificates        | CE, Fcc, RoHS, UKCA                |

# K26 Cloud

The cloud-based management system eliminates the need to install any additional programs and tools. It only needs an Internet connection to be available to understand any dynamics of the key, manage employees and keys, and grant employees the authority to use the keys and a reasonable use time.

## > Administrator

- Users, keys, access permissions administration
- Key reservation
- Key report, you always know who used which keys and when
- Keys Curfew
- Remote control by off-site administrator to remove or return keys
- See which user has accessed a key, and when
- Notify a manager via email alerts to critical events

## > APIs

- Standard web-based APIs
- Easy integration with other systems for ease of administration and the ability to drive processes

## List of K26 System

| Part # | Description                        | Qty           |
|--------|------------------------------------|---------------|
| #1     | K26 smart key cabinet              | 1 unit        |
| #2     | RFID smart key-fobs                | 26 + 5(spare) |
| #3     | K26 robust one-time security seals | 26 + 5(spare) |
