- Big, bright 7" Android touchscreen
- Automatic door closing
- Keys or keysets are individually locked in place
- Plug & Play solution with advanced RFID technology
- PIN, Card, Finger vein, Face ID access to designated keys
- Standalone Edition and Network Edition

The door closer, the new generation of i-keybox to control and manage keys, is a modular and scalable key management solution, providing a wide range of key control systems to meet the needs and size of your projects. It is the perfect solution for businesses who want to keep their keys safe and secure. The system ensures that only authorized staff are allowed access to designated keys, providing a full audit trail of who took the key, when it was removed and when it was returned.

Besides, the system helps to reduce common touchpoints between users, minimizing the possibility of cross-contamination and disease transmission among your team.
